

Is there a Working Fire Detection System in Organisation ?

Are the Fire Alarm Tested and maintained periodically?

Are the Sprinkler and hose-reels are Regularly inspected and tested ?

Non-Compliance of Safety Norms and Non-renewal of Safety Licenses

Poor infrastructure with absolute fire safety equipment

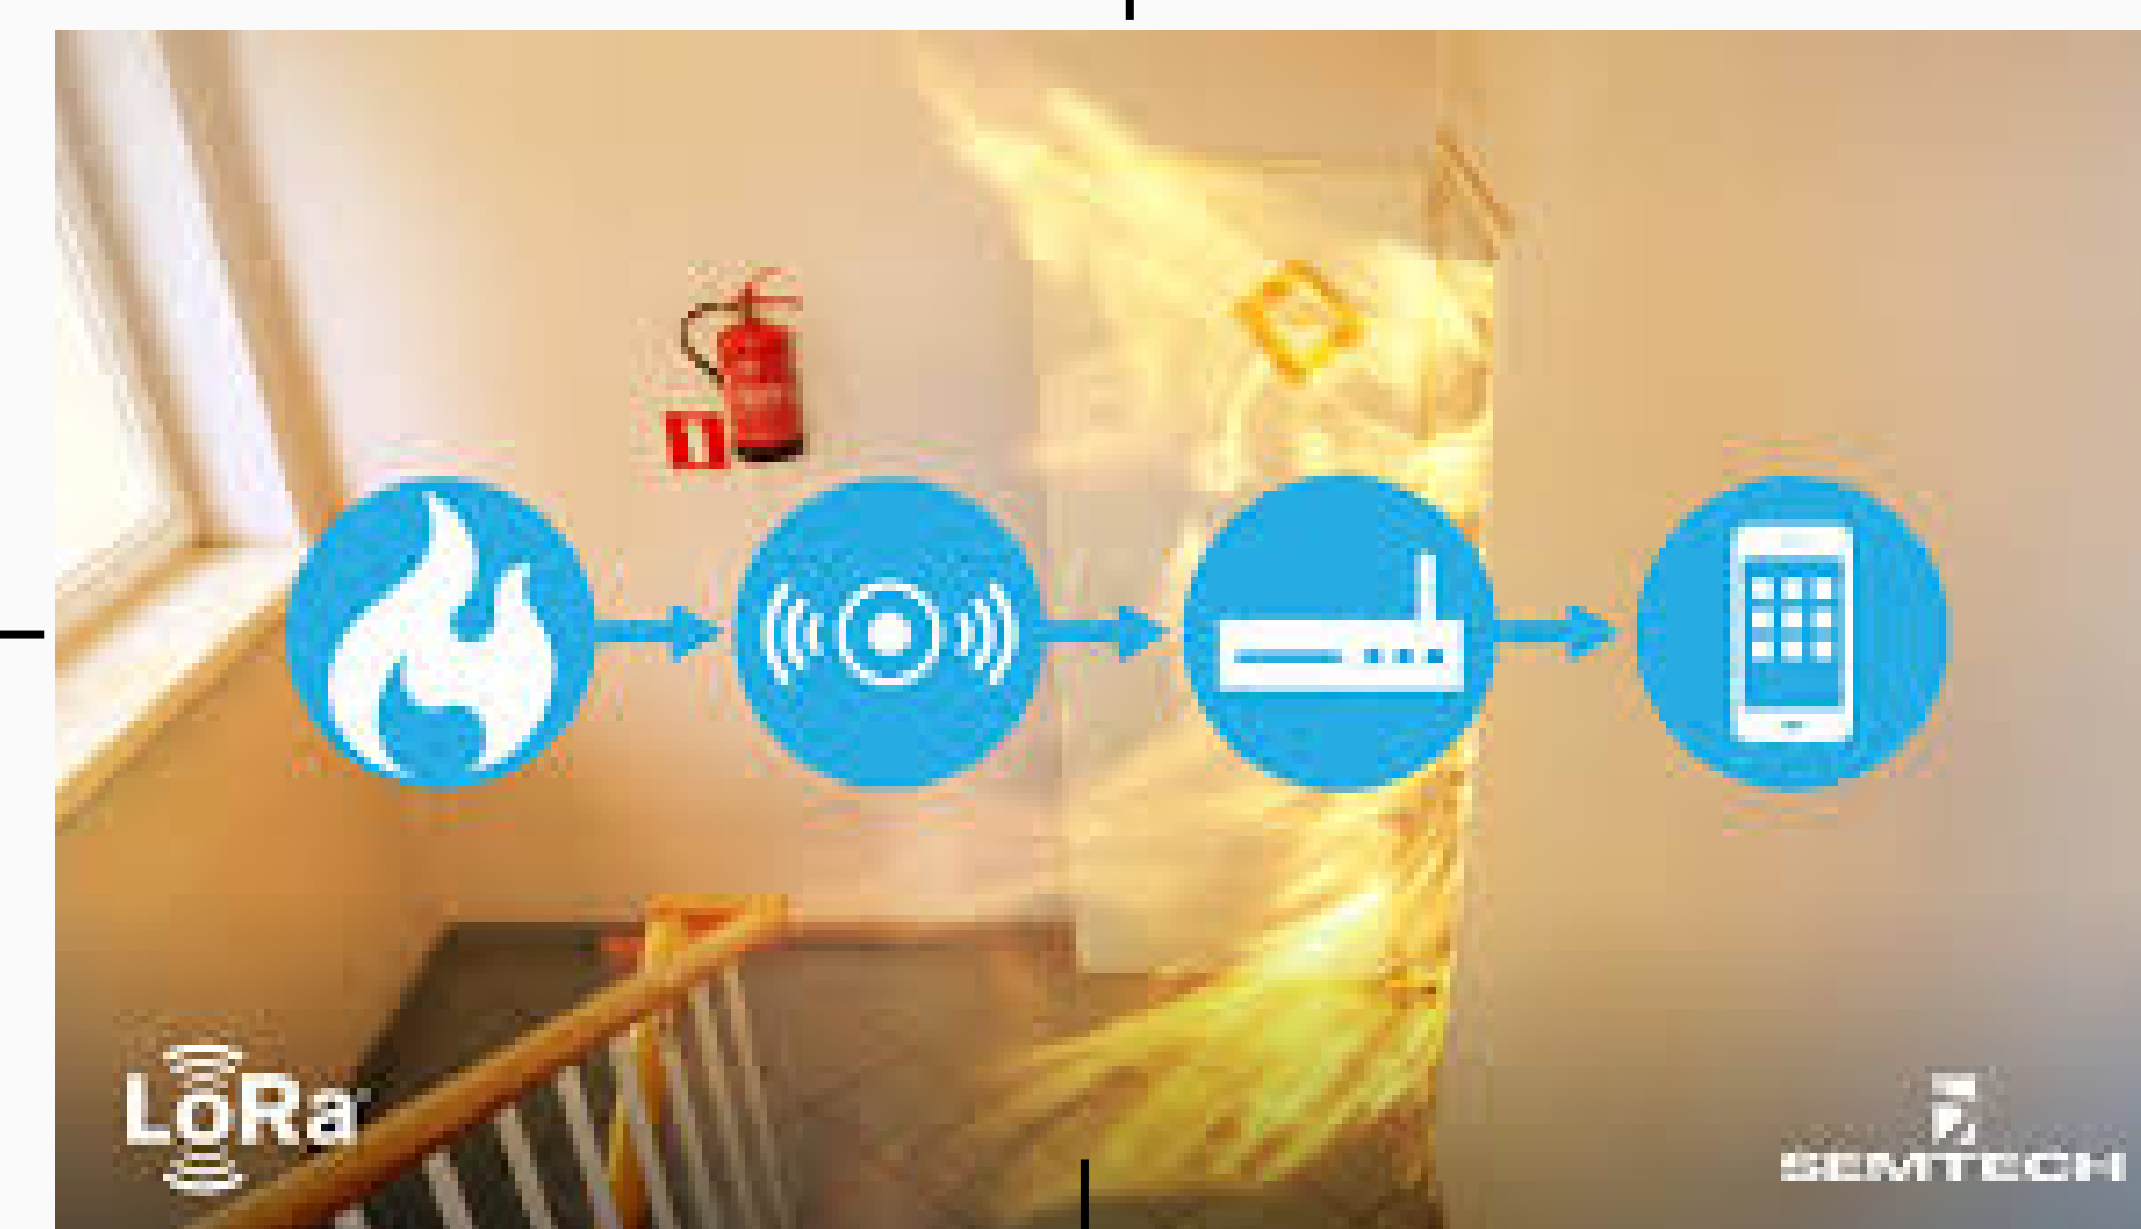

Stocking of combustible dust and flammable liquids and gases

Spot detector system:  
The system use individual sensors to monitor a fire zone.

The sensors are indicating appiliances the part of the system the sounds the alarm and alert occupants to fire Hazard.

If the smoke alarm sounds,get outside and stay outside .Respond Quickly -get up and go ,remember to know two ways out of every room ,get yourself outside quickly ,and go to your outside meeting place with your family .

By detecting a fire quickly and accuretly and providing early warning notiofication.
